39. State any one chemical method used to control the spread of malaria.

40. State the property of air that enables a child to fly a kite.

SECTION B

41. a) What is food poisoning?

- b) State any two ways one can tell that one had food poisoning.

(i)

(ii)

- c) Mention any one way to avoid food poisoning at home.

42. a) Write any two processes by which soil is formed.

(i)

(ii)

- b) Identify any one living organism that is part of the soil.

- c) Identify any one way of conserving soil.

43. Match the body organs in A with the functions in B correctly.

BODY ORGAN	FUNCTION
Heart	It stores food
Kidney	It changes poisonous substances into non-poisonous form
Liver	It pumps blood to all body parts
Stomach	It filters blood in the body

- 1) Heart: _____
 2) Kidney: _____
 3) Liver: _____
 4) Stomach: _____

44. State the importance of each features to a bird during flight

- (i) Streamlined bones: _____
 (ii) Hollow bones: _____
 b) Suggest any two ways birds are different from fish.

45. Study the diagram below of an underground stem and use it to answer the questions that follow.

- a) Name the parts marked X and Z.
 X: _____
 Z: _____
 b) To which group of underground stem does the plant above belong?

 c) How is the plant above propagated?

46. What is respiration? _____
 b) Mention any two raw materials used by the human body for respiration.

c) How do plants make use of the gas produced during respiration?

47. The diagram below shows the human ear. Study and use it to answer the following questions.

- a) Name the parts marked E and F.

E: _____

F: _____

- b) Give the function of part marked G.

- c) Suggest any one way of caring for the human ear.

48. State any two uses of friction at school.

(i) _____

(ii) _____

- b) Identify any two forms of energy produced due to friction.

(i) _____

(ii) _____

49. Study the diagram of a burning candle wax below. Use it to answer the questions that follow.

- a) Name the part marked P.

- b) What type of change takes place as the above candle melts?

- c) State what would happen to part P when a container is used to cover the candle above.

- d) Give the reason for your answer in (c) above.

50. a) Name the disease in rabbits whose signs are;- itching ears, ears bent down wards and wounds.
- b) State any two ways of controlling the above disease in rabbits.
- (i) _____
- (ii) _____
- c) Mention one common disease in both rabbits and poultry.
51. Study the diagram about light below and use it to answer the following questions.

- a) Name the light ray marked R.
- _____
- _____

- b) Why does light ray X bend towards the normal ray (N)?
- c) Name angle \angle _____
- d) What name is given to light ray marked X?
52. Study the table about non flowering plants below and use it to answer the questions that follow.

- a) Name the group of non-flowering plants shown in N.
- b) Mention any other example of non-flowering plant that can be put in part marked Q.
- c) State any one way in which plant mentioned in (b) above is similar to pine in group N.

- d) Mention any one organization in the environment that reproduces in the same way as plants in group M.

3. a) Give any two ways in which drug dependency can affect an individual.

(i) _____

(ii) _____

- b) State any two advice you can give an individual to avoid drug dependency.

(i) _____

(ii) _____

4. The diagram below shows the life cycle of a vector. Study it and answer the questions that follow.

- a) Name the vector whose life cycle is shown above.

- b) Name the stage marked 'C'.

- c) What does stage B feed on?

- d) Identify any one disease spread by the vector above.

55. The diagram below shows some activities done at home. Study it and answer questions that follow.

- a) Name the process taking place at A.

- b) State one way in which the type of change at A can be helpful in the environment.

- c) Identify any one way in which use of fuel B can be harmful to the environment.

- d) Suggest any one way of conserving fuel marked B.
