42. The diagram below shows an experiment conducted by a P.3 class about a water cycle. Study and use it to answer questions about it.

(a) What do the following parts represent in nature?

(i) **Kettle** .....

(ii) **Charcoal stove** .....

(b) What is the role of the bottle with cold water?

VIP) .....

(c) Mention any **one** process taking place in the above experiment.

43. (a) How is charcoal produced?

(b) Name the renewable resource from which charcoal is made.

- (c) State any **two** ways the use of charcoal for cooking can be reduced in our homes.
- (i) .....
- (ii) .....

44. (a) To which state of matter do the following belong?

(i) **Smoke:** .....

(ii) **Porridge:** .....

(b) Give any **two** effects of heat loss on matter.

(i) .....

(ii) .....

45. In the table below, part **A** shows tools used in administering first aid and part **B** shows their uses. Match them correctly and write first aid tools in the spaces below.

Part A: FIRST AID TOOL	Part B: USE OF THE TOOL
Stretcher	For cutting bandages
Safety pin	For cleaning and disinfecting wounds.
Iodine	For carrying casualties who cannot walk
A pair of scissors	For fastening bandages

a) ..... For cutting bandages.

b) ..... For cleaning and disinfecting wounds.

c) ..... For carrying casualties who cannot walk.

d) ..... For fastening bandages

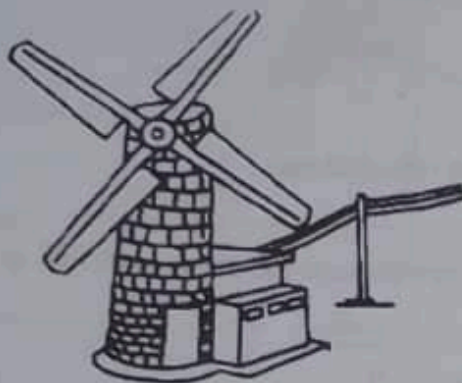

30. To which group of simple machines do wind lasses belong?

31. Give any **one** way plants and bees depend on each other in the environment.

The diagram below shows a device that uses wind. Use it to answer questions 32 and 33.

32. Identify the device shown in the diagram above.

33. How is the above device useful to people?

34. State **one** element of Primary Health Care (PHC) that helps to boost immunity of infants.

35. Name the element of weather used by farmers to winnow harvested crops.

36. State the first aid you would give to a person whose lower part of the leg has been bitten by a poisonous snake.
